

BZ-201 anti-greening dispersant additive

Composition: Organic polymer carboxylic acid

Appearance: colourless to yellowish liquid

Active ingredient: 100%

Solvent: None

Application scope: Wood coatings, industrial coatings, anti-corrosion coatings, coil coatings.

Recommended dosage: inorganic pigment: 0.5-3.0%; organic pigment: 20-50%; to the full amount: 0.1-0.5%.

Usage: In order to get the full effect of anti-greening, it is recommended to add 0.1% before and 0.2% after for better anti-greening effect.

Characteristics and advantages:

This kind of dispersant is multifunctional polymer dispersant with strong wetting and dispersing function, which can effectively prevent the precipitation and coarsening of the powder in the storage process of the paint and keep the viscosity stable.

It can be used in PE primer to prevent greening effect and has special effect on PE primer groove cracking; it can improve the surface effect of paint spraying and shoe painting.

Package: 25KG non-recycled blue plastic drum.

Before the product is completely empty, the lid should be tightly closed after use.

Storage: Keep away from heat and light source and keep away from light.

Precautions: Please carefully evaluate the effect on compatibility and shrinkage before use.

The above information is based on the product, due to the producer's formula, production process, construction conditions are different, the above statement is for reference only.

The company does not assume any legal responsibility, please test the dosage before use.

The company has the right to improve its own products, any changes in its specifications, without prior notice.
