

## BZ-208 Dispersant additive

**Composition:** special modified hydroxy acid ester

**Appearance:** light yellow transparent liquid

**Active ingredient:** 100%

**Solvent:** None

**Application scope:** Ink, PU coating, NC coating, industrial coating

**Recommended dosage:** Total amount: 0.1-0.5%; Inorganic pigment: 0.5-5%; Organic pigment: 10-50%.

**Usage:** In order to get the full effect, please test the most appropriate dosage before use, and add it before grinding.

### Characteristics and advantages

The dispersant is a low molecular hydroxyl acid type dispersant with strong wettability and good dispersibility.

It can significantly reduce the viscosity of the system of inorganic material in organic material and increase the filling amount.

**Package:** 25KG non-recycled blue plastic drum.

Before the product is completely empty, the lid should be tightly closed after use.

**Storage:** Keep it away from heat and light source and keep it away from light.

**Caution:** Please carefully evaluate the specific dosage in the coating system before use.

The above information is based on the product. Due to the different formulations, production processes and construction conditions of the producers, the above statements are for reference only.

We do not assume any legal responsibility. Please test the dosage before use.
